Forecast for Thursday 24 Jun 2021

Weather: A cloudy start to the day with some outbreaks of heavier rain through the morning, in the afternoon cloud will break up a little allowing some sunny spell to develop. Though showers may also develop, with a low risk of these turning heavy and thundery. Into the evening cloud will thicken from the west once again with persistent rain overnight.

Chance of cloud free mountain/hill tops above 800m: Less than 10% by early morning increasing to 60% by mid-afternoon, decreasing to less than 10% by the evening,

Visibility: Poor with cloud bases around 400m with rain and drizzle, from lunchtime onwards cloud bases will lift and break up to around 700m allowing hill tops to be visible from time to time, though in heavy showers conditions will suddenly deteriorate through the afternoon. Becoming poor again in the evening as cloud thickens and bases fall to 600m and rain arrives.

Meteorologist's View

Conditions will be variable throughout the day with poor visibility at times this means good navigations skills are required.

Forecast for Friday 25 Jun 2021

Weather: A cloudier start with some rain and drizzle, becoming much brighter and drier by mid-morning with sunny spells through the afternoon and into the evening. Though isolated heavy showers are possible from later afternoon until the evening.

Maximum wind: North-westerly 12mph

Chance of cloud free mountain/hill tops above 800m: Less than 10% becoming 90% from mid-morning.

Visibility: Poor first thing with cloud bases around 400m and drizzle on hill tops, increasing to become generally very good by mid-morning though quickly deteriorating in and around any showers as cloud bases temporarily fall to around 600m.

Temperature: **Valleys:** Plus 14 Celsius.
At 800m: Plus 9 Celsius.
Freezing level: Above the summits
